Oil Token (Oil) — White Paper

Oil Token (Oil)

Symbol: Oil token

Slogan: Digital Gateway to Crude Oil

Oil Token is a TIP-3 token on the TON blockchain, where each unit represents one barrel of crude oil. It provides secure, transparent, and global access to the digital oil market.

Project Introduction

Project Objective:

To create a secure and transparent digital asset representing real crude oil, accessible to users worldwide.

Key Features:

- Fixed supply: 10,000,000,000 tokens

- Fully released ownership, no additional minting

- Transparent and traceable blockchain transactions

- Global accessibility

- Easily transferable and verifiable

Problem & Opportunity

Traditional Oil Market Challenges:

- Limited access for small-scale traders

- Legal and international complexities

- No direct access for ordinary users

Opportunities:

- Digitization of oil assets

- Enhanced transparency and security via blockchain

- Global access to real oil assets

Oil Token Advantages:

- Each token represents one barrel of oil

- Fixed and transparent supply

- Fully trackable on the TON blockchain

Solution

How Oil Token Works:

- TIP-3 standard on TON blockchain

- 1 token = 1 barrel of crude oil

- Transparent distribution and tracking

Technical Features:

- Jetton contract deployed with metadata on GitHub

- Listed in TON wallets

- Initial liquidity provided on DEX platforms

Roadmap

Phase 0 — Launch: Deploy Jetton contract, publish metadata, list in wallets, initial DEX liquidity

Phase 1 — Accessibility: List on major DEX, activate community, attract holders, AMA sessions

Phase 2 — Adoption: Partnerships with Web3, integrate in small services, build payment tools

Phase 3 — Expansion: Strengthen liquidity, CEX listings, smart contract audit

Tokenomics (Part 1)

Total Supply: 10,000,000,000 tokens

Locked Supply (50%) — 5,000,000,000 tokens:

- Locked for 5 years

- 1 billion tokens unlocked every 2 years

- Monthly distribution: 100 million tokens

- Fully distributed in ~136 months (~11 years 3 months)

Initial Distribution:

- 1,000,000,000 tokens randomly distributed to Tonkeeper holders at launch

Tokenomics (Part 2)

Remaining Tokens — 4,000,000,000 tokens:

- 1,000,000,000 (10%) — Airdrops & Rewards

- 2,000,000,000 (20%) — Public Sale on Exchanges

- 500,000,000 (5%) — Core Team

- 500,000,000 (5%) — Future Community Development
